Hours on job: 48

- Objective(s) for the days:
 - Clear thirteen logs off Lower Dungeness trail from intersection with Three O'Clock Ridge trail down to intersection with Gold Creek trail.
 - Rebench narrowed sections of trail.
- Task(s) accomplished:
 - All fallen trees but one removed from trail via crosscut/katana.
 - On the first day, one team started at Three O'Clock ridge trail and worked down while a second team started at the Gold Creek end of the trail and worked up. Both teams cleared until they met up; then all hiked down and exited from lower trailhead.
 - The last tree was removed on the second day via a small crew with chainsaw. A quick task since the tree was only minutes from the new lower trailhead.
 - Worst of the narrowed trail sections rebench.
- Task(s) remaining:
 - Failing puncheons still need replacement or conversion to turnpike.
 - Remove eleven fallen trees that are across or intruding into Lower Dungeness trail between upper trailhead and intersection with Three O'clock trail.

Some of the trees needing removal

Tree removal and rebenching
